Profile

A **self-motivated** student with a few years of experience in the **software development** field. I taught myself to code since the first year of High School through several **group** projects including **desktop** and **web** apps. Keen to secure a high functioning role by expressing potential **IT** skills learnt during the working career, which will provide opportunities for further **development** and **progression**.

Work Experience

Weevo S.r.l.
Castiglione delle Stiviere Italy

Junior Back-End Web Developer   01.2017 – 01.2017
- 2-week internship in the **Web development** department of the company, working on **web applications** (landing pages) for clients' websites.
- Effectively looked for intense projects to develop **programming** and **service** skills.
- **Back-End** Web development using **PHP** language, for creating **forms** connected to databases via **MySQL**.
- Worked under the supervision of the **lead developer**, as part of a small team. Therefore, it was a great opportunity for sharpening working **skills** related to **time management** and **teamwork**.

C.e.d. S.r.l.
Castiglione delle Stiviere Italy

Junior Database Administrator   01.2016 – 01.2016
- 2-week internship in **data management** company.
- Have gained some basic knowledge about the use of **databases** with the main appliance of **MySQL** and **phpMyAdmin** tools.
- Access management, **software** installations, **hardware** issues and orders.
- Training with **team** members.

DODICIPIXEL *Guidizzolo Italy*

Junior Front-End Web Developer   06.2015 – 08.2015
- 2-month industrial placement in a **freelance** company specialized in designing/developing clients' websites (mostly **e-commerce**) and **Web applications** for businesses.
- Worked with **WordPress** platform, using specific WordPress **plugins** and **tools** and worked with Google Analytics and **SEO** tools for the first time.
- Helped to gain familiarity with the use of **Content-Management-Systems** and front-end frameworks(**Bootstrap**).

Education

University of Strathclyde
Glasgow United Kingdom

Software Engineering   09.2018 – 07.2022
First-Year classes cover foundations of **programming** by learning **JAVA** and **Python** thorough the understanding of how **computer frameworks** work and develop. This facilitates the comprehension of the concept of **computation** along a broad knowledge of computer systems and organization.

Institute of Higher Education Luigi Cerebotani
Lonato del Garda Italy

Information Technology   09.2012 – 07.2017
Overall Grade: 91/100 - Diploma EQF Level 5 / SCQF Level 8

This diploma assisted me with gaining an **advanced** knowledge of web programming languages starting from scratch until building my first professional **project**, that consisted into creating an **informational webpage**, regarding the topic of Deep Web, with a **web form** connected to a database using **MySQL** and **PHP**.

Skills

IT/Technical Skills

- **Front-End** Web Development.
- **Back-End** Web Development.
- **Languages**: JavaScript, HTML5, CSS3, PHP, Java, Python.
- **Environments**: Notepad++, Eclipse, BlueJ, Brackets, Visual Studio Code.
- **Operating Systems**: Windows, Ubuntu Linux.
- **Database** Management: MySQL, phpMyAdmin, WNMP, XAMPP and HeidiSQL.
- Basic use of Google **Analytics** and **SEO** tools for **e-commerce** websites.
- Professional use of **CMS**, **Libraries** and **Front-End Frameworks**: WordPress and Bootstrap, jQuery.

Key Skills

- **Keeping up to date**: my few professional experiences involved progressively about learning new **web technologies** which introduced a new way of enhancing **self-development** skills, to follow **fast-changing** trends inside the **web development** field.
- **Communication and Team-Work**: as being part of small **teams** throughout the internships, **communication** was fundamental to keep updating each other about the **developments** of the projects as well as it led to a great understanding between us and to manage loads of work during the day. All the tasks were assigned mostly through Trello **project management** application and it contributed to dividing **equally** each assignment to the group.
- **Time Management**: during the few internships, it was helpful to learn how to manage the **time** over the numerous projects handed over, in which there were **deadlines** that needed to be followed **strictly**. And this relevant skill developed the way of working quickly, but the most important improvement was to work with further **efficiency**.
- **Styling**: I am extremely **meticulous** about everything I work on. I make a heavy use of **documentation**, to understand better the code that I am writing and through others online **resources** (such as **Stack Overflow**). I test my code thoroughly before giving it to anybody else and this allowed me to gain a reputation for writing **high-quality** code which requires far less **debugging** than that produced by others.

Achievements/Interests

Class Representative   09.2016 – 07.2017

This **leadership** role allowed to grow my **self-confidence** and **communication** skills through the responsibility of presenting problems to Professors and to find out solutions that could contribute to the benefit of everyone.

Interests

- Enjoying travelling and getting out of the **comfort zone** to adapt to any possible situation:
  - Spent one year abroad in **Germany** working part-time along with learning some basics of the language.
- Learning programming languages via **Code Academy, Udemy** and other web-based learning platforms.
- **Reading** newspapers and articles.
- **Volunteering** in temples:
  - Central Gurdwara Singh Sabha Glasgow   09.2018 – Present
  - Gurudwara Singh Sabha Kalghidhar Sahib Ji Castiglione delle Stiviere   09.2012 – 09.2017
