Profile

A **self-motivated** student with a few years of experience in the **software development** field. I taught myself to code since the first year of High School through several **group** and **solo** projects including **desktop** and **web** apps. Keen to secure a high functioning role by expressing potential **IT** skills learnt during the working career, which will provide opportunities for further **development** and **progression**.

Work Experience

DTT Multimedia B.V.
Amsterdam, Netherlands

Full Stack Web Developer   04.2019 – Present

- 5 months internship in a **multimedia** company, working on different **web** and **mobile** applications.
- **Back-End** Web Development:
  ◦ **Phalcon's PHP** web **framework** utilizing **MVC** pattern for managing **multiplatform** projects including **web** projects and **API endpoints** for **mobile** applications.
  ◦ **Node.js** and **Express.js** to handle **REST APIs** for a successful **Android** application (VoNo).
- **Front-End** Web Development with **Vue.js** framework, **Vanilla JS**, **jQuery**, **HTML5** and **CSS3**.
- **Refactored** code for old projects by fixing **bugs** and **increased** performance through the help of **SonarQube**.
- Implemented **Unit** tests for APIs with **PHPUnit** and **Postman**.
- **Git Version Control** with **Bitbucket**.
- **Agile Software Development** with **Redmine** and **SCRUM** with **JIRA**.

Weevo S.r.l.
Castiglione Delle Stiviere, Italy

Junior Back-End Web Developer   01.2017 – 01.2017

- 2-week internship in the **Web development** department of the company, working on **web applications** (landing pages) for clients' websites.
- Effectively looked for intense projects to develop **programming** and **service** skills.
- **Back-End** Web development using **PHP** language, for creating **forms** connected to databases via **MySQL**.

DODICIPIXEL
Guidizzolo, Italy

Junior Front-End Web Developer   06.2015 – 08.2015

- 2-month industrial placement in a **freelance** company specialized in designing/developing clients' websites (mostly **e-commerce**) and **Web applications** for businesses.
- Worked with **WordPress** platform, using specific WordPress **plugins** and **tools** and worked with Google Analytics and **SEO** tools for the first time.

Education

University of Strathclyde
Glasgow United Kingdom

Software Engineering   09.2018 – 07.2022

First-Year classes cover foundations of programming by learning JAVA and Python thorough the understanding of how computer frameworks work.

ITIS Luigi Cerebotani
Lonato del Garda Italy

Information Technology   09.2012 – 07.2017
Diploma EQF Level 5 / SCQF Level 8

This diploma assisted me with gaining advanced knowledge of web programming languages.

Skills

IT/Technical Skills

- **Front-End** Web Development.
- **Back-End** Web Development.
- **Languages**: Vanilla JS, HTML5, CSS3, PHP, Java, Python.
- **JS Environment**: Vue.js, jQuery, Node.js, npm, Express.js, Webpack.
- **Environments**: PhpStorm, Notepad++, Eclipse, BlueJ, Brackets, Visual Studio Code.
- **Management**: Redmine and JIRA.
- **Testing**: PHPUnit and Postman.
- **Operating Systems**: Windows, Ubuntu Linux.
- **Database** Management: MySQL, phpMyAdmin, XAMPP and HeidiSQL.
- Professional use of **WordPress** and **Bootstrap**.

Key Skills

- **Keeping up to date**: my few professional experiences involved progressively about learning new **web technologies** which introduced a new way of enhancing **self-development** skills, to follow **fast-changing** trends inside the **web development** field.
- **Communication and Team-Work**: as being part of small **teams** throughout the internships, **communication** was fundamental to keep updating each other about the **developments** of the projects as well as it led to a great understanding between us and to manage loads of work during the day. All the tasks were assigned mostly through different software (including **Redmine** and **JIRA**) depending on the software environment and it contributed to dividing **equally** each assignment to the group.
- **Time Management**: during the few internships, it was helpful to learn how to manage the **time** over the numerous projects handed over, in which some **deadlines** needed to be followed **strictly**. And this relevant skill developed the way of working quickly, but the most important improvement was to work with further **efficiency**.
- **Styling**: I am extremely **meticulous** about everything I work on. I make heavy use of **documentation**, to understand better the code that I am writing and through other online **resources** (such as **Stack Overflow**). I test my code thoroughly before giving it to anybody else and this allowed me to gain a reputation for writing **high-quality** code which requires far less **debugging** than that produced by others.

Achievements/Interests

Class Representative   09.2016 – 07.2017

This **leadership** role allowed to grow my **self-confidence** and **communication** skills through the responsibility of presenting problems to Professors and to find out solutions that could contribute to the benefit of everyone.

Interests

- Enjoying travelling and getting out of the **comfort zone** to adapt to any possible situation:
  - Spent one year abroad in **Germany** working part-time along with learning some basics of the language.
- Learning programming languages via **Code Academy, Udemy** and other web-based learning platforms.
- **Reading** newspapers and articles.
- **Volunteering** in temples:
  - Central Gurdwara Singh Sabha Glasgow   09.2018 – Present
  - Gurudwara Singh Sabha Kalghidhar Sahib Ji Castiglione Delle Stiviere   09.2012 – 09.2017
